

MINI BULK BLASTER

STANDARD BULK FEATURES

- The patented HALOK® closure safety system
- Manway Stay Brackets allow operators to easily secure and fasten the manway into place
- CEN (Controlled Expansion Nozzle) Blowdown reduces blowdown noise level to below 100dB
- Anti-slip twisted ladder rungs give a firm foothold in the worst conditions
- Air inlet ball valve with lock-out adds an additional level of security during maintenance
- Bulk rack pipe stubs to be used with our Bulk Bag Rack
- Four shipping tie down lugs allow easier securing for shipment
- Designed to accommodate four-point lifting

Schmidt® bulk units are designed to maximize safety and productivity by minimizing downtime and maintenance costs. All bulks are standard with the proven Halok closure safety system, Ergo-ladder, Manway Stay Brackets, and CEN blowdown system. The same high-productivity blasting systems are now available in a smaller, more portable size: 52 cf.

FEATURES

- Blast all day with 2 nozzles, increasing production and productivity
- Compatible for tight spaces (will fit in a sea container)
- Easier to transport compared to 120 cf and 160 cf bulk tanks
- Perfect for medium and large-sized jobs
- Designed to utilize existing bulk bag racks to refill with supersacks

Shown with
optional Fork
pocket Skid

*Recommended to be used with
our Bulk Bag Rack

SUPER BULK BLASTER

Schmidt Super Bulk units are designed to maximize productivity while minimizing downtime to reload. These Super Bulk systems are equipped with the same safety features as our other proven standard bulk blasters. Super Bulk blast systems are ideal for large blasting projects, such as shipyard facilities and those with substantial blasting requirements.

FEATURES

- The massive storage capacity meets the high usage requirements in large blast facilities
- The large abrasive storage capacity facilitates the purchase of abrasives in bulk quantities at a lower price, resulting in significant cost savings
- Super Bulk blasters are fitted for eight blast outlets (customizable for more outlets)
- Super Bulk Systems are equipped with the same safety features as our standard bulk blasters

STANDARD BULK FEATURES

- The patented HALOK® closure safety system
 - Manway Stay Brackets allow operators to more easily secure and fasten the manway into place
 - CEN (Controlled Expansion Nozzle) Blowdown reduces blowdown noise level to under 100dB
 - Anti-slip twisted ladder rungs give a firm foothold in the worst conditions
 - Air inlet ball valve with lock-out adds an additional level of security during maintenance
- Bulk rack pipe stubs to be used with our Bulk Bag Rack
Four shipping tie-down lugs allow easier securing for shipment
Designed to accommodate four-point lifting

SPECIFICATIONS

Available sizes are 500 cu. ft., 650cu.ft., and 800cu.ft.

Custom sizes are available.
